

Janet Ubom

DATA & AI GOVERNANCE LEADER

AI Governance · AI Readiness · Responsible AI · Enterprise Data Governance · Privacy & Sensitive Data Risk
JanetUbom14@gmail.com · Miami, FL · jubom.github.io

PROFESSIONAL SUMMARY

Data & AI Governance leader with 10 years of progression from analytics and data quality to enterprise data governance, now building the governance that makes enterprise data safe and ready for AI. Designs AI-readiness certification, sensitive-data risk programs, and governance operating models on Databricks Unity Catalog, and turns them into decisions that executives and steering committees can approve.

- **AI readiness and Responsible AI:** Built certification standards that decide when people and AI systems (Genie, agents, copilots) may treat a dataset or metric as authoritative.
- **Privacy and sensitive-data risk:** Quantified exposure across ~1,600 sensitive columns and authored a phased tagging, masking, and row-level security program.
- **Operating models and leadership:** Led a 12-person stewardship team; designed RACI-based models that separate technical delivery from governance authority.
- **AI tooling evaluation:** Assesses AI-assisted governance and data quality platforms against internal success criteria, not vendor-defined scope.

CORE COMPETENCIES

- **AI Governance:** AI readiness certification · Responsible AI · Human-in-the-loop oversight · AI tooling and vendor evaluation · NIST AI RMF · ISO/IEC 42001 · EU AI Act
- **Data Governance:** Operating models and RACI · Policies, standards, and controls · Semantic layer and metric certification · Metadata, catalog, and lineage · MDM
- **Privacy and Risk:** Sensitive-data discovery and classification · PII tagging taxonomy · Masking and row-level security strategy · GDPR · CCPA
- **Data Quality:** Rule design (completeness, validity, referential integrity, timeliness) · DQ backlog and remediation workflow · Monitoring and quality scoring
- **Leadership:** Steering committee and executive proposals · Cross-functional and vendor alignment · Team leadership · Change management and adoption
- **Platforms and Tools:** Databricks Unity Catalog · Genie and Metric Views · Soda · Collibra · Informatica · Snowflake · Azure · Azure DevOps · AWS Glue · Power BI · Tableau · Jira · Confluence · SQL · Python

EXPERIENCE

AI Readiness & Enablement Lead — The Baldwin Group · 05/2025 – Present

Expanded a data governance role into AI-readiness governance for a Databricks Unity Catalog platform serving BI, data quality, Genie, AI agents, and copilots.

- **Sensitive-data risk program:** Led a Unity Catalog sensitive-data assessment across two dozen Silver and Gold schemas, identifying ~1,600 sensitive columns and quantifying high-risk exposure by category.
- **PII tagging program:** Authored a phased program for steering-committee approval: tagging taxonomy, a pilot on the highest-exposure consumer-facing tables, programmatic tagging of all high-risk columns in 8 weeks, then masking and row-level security.
- **AI-readiness certification:** Designed the semantic model operating model and a 6-stage certification lifecycle (Draft to Monitored) with explicit AI-readiness criteria, so metrics used by people and AI systems are owned, validated, and consistent.
- **Governance operating model:** Defined a RACI across 15 capabilities and 4 parties that separates implementation partner delivery from governance and certification authority.
- **Grounding AI in governed definitions:** Authored the PoC strategy for a vendor-neutral semantic model and ontology compiled into Unity Catalog Metric Views, grounding Genie answers in certified business metrics.
- **AI tooling evaluation:** Led gap analysis of an AI-assisted data quality platform PoC across 17 capabilities and 19 rule candidates, widening the evaluation beyond the vendor's proposed scope.
- **Data quality controls:** Built a backlog of 30+ DQ rules across BI and Commissions, each pairing a business definition with executable SQL and an AI-assistant prompt.

AI Governance & Enablement Program Manager — Microsoft (Contract) · 04/2026 – Present

- **Strategy-to-execution traceability:** Designed the GitHub-to-Azure DevOps hierarchy (Epic, Feature, Story, Task) linking strategic priorities and key results to delivery work, improving leadership visibility across AI-augmented execution initiatives.
- **Governance and reporting requirements:** Defined executive reporting and governance requirements for AI-enabled programs with program, engineering, and operations leaders.
- **AI workflow oversight:** Evaluated where AI agents and AI-assisted capabilities fit into operational workflows while keeping quality validation and human-in-the-loop review.

Data Governance Lead — RNDC (Contract) · 04/2023 – 05/2025

- **Enterprise governance framework:** Led design and rollout of an enterprise data governance framework on Informatica and Power BI, improving data accuracy and compliance.
- **Team leadership:** Led a 12-member data stewardship team, setting expectations, coordinating stewardship, and owning accountability for data quality standards.
- **Cross-functional adoption:** Aligned IT, compliance, and business teams on governance practices, reducing data incidents.
- **Remediation:** Delivered a data remediation project that reduced critical data errors, improving reporting accuracy and regulatory compliance.

Senior Data Steward — Macy's Inc. · 05/2022 – 04/2023

- Built a centralized metadata repository in Snowflake and Azure, improving traceability and retrieval time; implemented automated DQ monitoring with Informatica and SSIS; co-authored GDPR and CCPA data usage policies.

Senior Associate III, Data Management Consultant — Turnberry Solutions · 04/2021 – 05/2022

- Led MDM integration into the CRM, reducing customer data inconsistencies; led data integration and migration with Talend and AWS Glue.

Senior Data Quality Analyst — Creative Circle (Client: FleetCor) · 07/2020 – 03/2021

- Built a data quality framework in Alteryx and Power BI that increased data accuracy by 25%; automated validation checks to cut processing time.

Earlier: Technical Project Manager, Warner Bros. (2019–2020) · Data Analyst, SAP (2018–2019) · Data Analyst, Northwest Metals (2016–2018)

EDUCATION & CERTIFICATIONS

- **B.S., Informatics & Data Science** — Texas Woman's University, Denton, TX
- **Certified Data Management Professional (CDMP), DAMA International** — Exam scheduled October 2026
- **IAPP Artificial Intelligence Governance Professional (AIGP)** — Expected 12/2026
- **Certified GDPR (SAP)** — 2019
